- 📍 Rivne, Ukraine

## SKILLS

- Programming languages: GO (Golang)
- Database: PostgreSQL, SQLC, Goose
- Web technologies: GraphQL, HTML, CSS, React
- Tools: Docker, GCP, GitHub, Git, Ngrok, Nginx, Linear
- Practices: CI/CD

## LANGUAGES

Ukrainian | Native  
English | Upper-intermediate

## PROFILE

Highly motivated Golang Developer with experience at DepsHub, adept at creating schemas for PostgreSQL databases, implementing CI/CD pipelines, and utilizing various tools for efficient project management. Seeking opportunities to contribute expertise in Golang development to innovative projects.

## WORK EXPERIENCE

### GOLANG DEVELOPER

#### Depshub

February 2024 - present

- Creating schemas for the Postgres database and writing migration with goose. Adding pipelines in CI/CD to enhance code quality.
- Utilized Git for version control and GitHub for repository management, enhancing team collaboration and source code management.
- Use the Linear tool for project management, ensuring timely delivery and efficient task tracking.

#### Personal projects

May 2024 - present

#### Weatherly:

- Developed the Weatherly API, a weather service built in Go that quickly gives weather updates on both web browsers and terminal interfaces.
- Containerized the application using Docker to ensure easy deployment and consistent performance across different environments.
- Hosted and maintained the application on Google Cloud Platform, taking advantage of its powerful features to provide reliable and scalable access.
